Welcome

TODO: What Mr. Klanky is: one window for a team of coding agents.

TODO: Who it is for.

TODO: How this guide is organized.

First start

TODO: Install the app.

Your first project

TODO: Add a project folder.

Your first agent

TODO: Pick a harness: Claude Code, Codex or Pi.

TODO: The first prompt.

The agent window

TODO: One window for each agent.

The band

TODO: The bot, its state and its context.

The session

TODO: The agent's terminal.

The footer

TODO: Mailbox, hand, agents, memory, keys.

The board

TODO: Agents take their work from a Kanban board.

Columns

TODO: Todo, Doing, Needs Human, Review, Done.

Cards

TODO: A card is one piece of work with one owner.

The backlog

TODO: Ideas before they are cards.

Review

TODO: Review each card like a pull request.

The Card view

TODO: What and why, the files, the diff.

Approve or request changes

TODO: What happens on approve.

The Side: Editor, Live and Card

TODO: The right column of an agent window.

Editor

TODO: Files, Markdown source and rendered.

Live

TODO: Running pages: an HTML file, a dev server.

Layouts

TODO: Side by side, top and bottom.

The agent points

TODO: The glow and the bot.

Talking with agents

TODO: How you and your agents talk.

Ask about a line

TODO: Cmd+click, Shift+Cmd+L.

Messages

TODO: Agents message the boss; you see all of it.

Your attention

TODO: Agents wait on you as little as possible.

The hand

TODO: Who waits on you, and why.

Needs Human

TODO: A card that only you can move on.

Windows and keys

TODO: Many agents, many windows.

The switcher

TODO: Cmd+K.

Tiling

TODO: Magnet keys.

Mini-session

TODO: A small window for a quiet agent.

Sessions and remote

TODO: Agents that keep working.

Continue a session

TODO: Pick up a conversation.

Remote

TODO: Agents on another computer.

Secrets

TODO: Tokens and keys for your agents.

Give an agent a secret

TODO: The secret sheet.

Settings and updates

TODO: Make it yours.

Settings

TODO: App and project settings.

Updates

TODO: The version check.

Appendix A: Keys

TODO: All keys of the app (Cmd+/ shows them).

Appendix B: Performance and troubleshooting

TODO: When something is slow or wrong.

Memory

TODO: The footer memory popover.

Logs

TODO: app.log, crash.log, perf.jsonl.
